Q:1 Read the passage given below and answer the following questions. (10)

Scientists know many things about the Sun. They know how old it is. The Sun is more than 4½ billion years old. They also know the Sun's size. The Sun may seem small, but that is because it is so far away. It is about 93 million miles (150 million kilometers) away from the Earth. The Sun is so large that the diameter of the Sun is 109 times the Earth's diameter. The Sun also weighs as much as 333,000 Earths. The Sun is in the center of our Solar System. It is a big star. Besides the Sun, the Solar System is made up of the planets, moons, asteroid belt, comets, meteoroids, and other objects. It is made of extremely hot gases. It is the ultimate source of heat and light for the solar system. Life on Earth depends on light and heat from the sun. We can say that the sun is the head of solar family or solar system.
